DETAILED ACTION***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-22,24-36,38 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-36 of copending Application No. 11/361061. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

Claims 20-22,24-33,38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yip '483. This patent shows a food processor/peeler including cup 30, cover 20, and plastic blades 44. It is not clear from the patent what type of plastic forms the blades. Elastomeric material is well known for its' durability, cheapness in replacement, etc. In order to reduce maintenance costs, it would have been obvious at the time of the invention to modify Yip '893 by using elastomeric material as the blade material since the use of elastomeric material is well known in the art and of no patentable merit. The remaining limitations of these claims would have been obvious

design choices only once the basic apparatus was known. For example, texturing a blade to help move the material is well known in the art and of no patentable merit.
